2011 Cancer Annual Report
Using data from 2010

Franciscan
ST. ELIZABETH HEALTH
Franciscan St. Elizabeth Health Cancer Registry

The Cancer Registry is accredited by the American College of Surgeons Commission on Cancer and is staffed by a certified cancer registrar. The registry maintains cancer data and follow-up on patients diagnosed and/or treated at Franciscan St. Elizabeth Health. This data is reported to both the Indiana State Department of Health Cancer Registry and the American College of Surgeons National Cancer Data Base.

In 2010, there were 534 analytic cases accessioned. These cases were used in the statistical analysis of 2011 Franciscan St. Elizabeth Health Cancer Annual Report data.

Franciscan St. Elizabeth Health Cancer Registry currently maintains follow-up on approximately 6,666 patients. Lifetime follow-up is collected on all analytic cases to compare treatment outcomes and survival rates. The registry consistently maintains a lost-to-follow-up rate of 10 percent or less as mandated by the American College of Surgeons Commission on Cancer.

The 2010 studies completed included “CP3R 2007” and “Head & Neck Survival Comparison Statistics”

—Charla J. Dark, CTR, Manager, Cancer Registry

County Stats

Other Indiana counties: 2% (10)
Out of state: 1% (3)
The tables compare the top primary sites at FSEH with the national statistics of new cancers. The percentages are based on the actual number of cases reported by site and sex both nationally and at FSEH. The number of new cancer cases at FSEH for 2010 totaled 534 (208 men, 326 women).

*American Cancer Society Facts & Figures 2010

Cancer-related deaths reported by Franciscan St. Elizabeth Health Cancer Registry in 2010 totaled 222. (105 men, 117 women). These figures were derived through the Cancer Registry’s efforts to do lifetime follow-up on all cancer patients in our database.
