

2013 Cancer Annual Report

Using data from 2012

Franciscan

ST. ELIZABETH HEALTH

Franciscan St. Elizabeth Health Cancer Registry

The Cancer Registry is accredited by the American College of Surgeons Commission on Cancer and is staffed by a certified cancer registrar. The Registry maintains cancer data and follow-up on patients diagnosed and/or treated at Franciscan St. Elizabeth Health. This data is reported to both the Indiana State Department of Health Cancer Registry and the American College of Surgeons National Cancer Data Base.

In 2012, there were 506 analytic cases accessioned. These cases were used in the statistical analysis of 2013 Franciscan St. Elizabeth Health Cancer Annual Report data.

Franciscan St. Elizabeth Health Cancer Registry currently maintains follow-up on approximately 6,664 patients. Lifetime follow-up is collected on all analytic cases to compare treatment outcomes and survival rates. The registry consistently maintains a lost-to-follow-up rate of 10 percent or less as mandated by the American College of Surgeons Commission on Cancer.

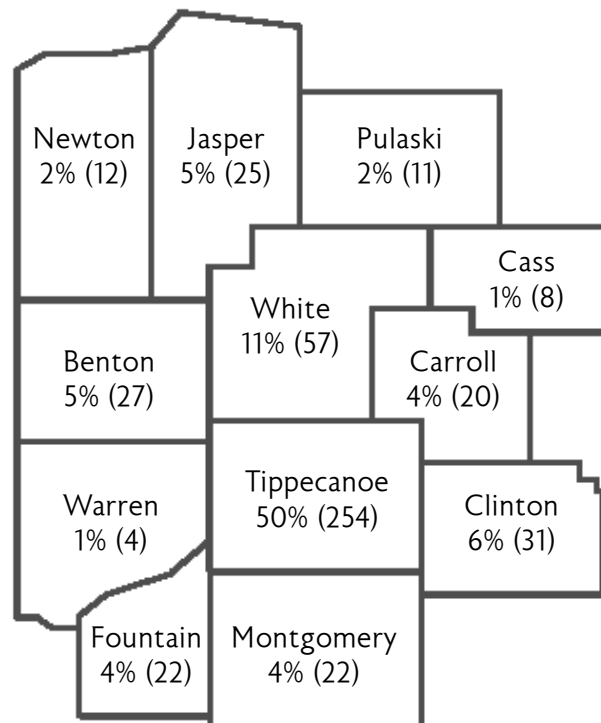

The 2012 studies completed include: “2000 – 2009 NSC Lung Cancer Comparison With NCDB and 1994-2004 Survival Comparison” and “2010 Breast Cancer Treatment In Concordance With NCCN Guidelines.”

–Charla J. Dark, CTR, Manager, Cancer Registry

Franciscan St. Elizabeth Health employees and their families participate in several community walks to raise awareness of cancer in Tippecanoe and surrounding counties, ranging from Relay for Life (top) to Making Strides Against Breast Cancer.

County Stats

Other Indiana counties: 1% (7)

Out of state: 1% (6)

Leading Sites of Cancer Incidence

Male	FSEH	National Estimate*	FSEH Actual
Lung	45	14%	22%
Colorectal	26	9%	13%
Prostate	19	28%	9%
Bladder	17	6%	8%

Female	FSEH	National Estimate*	FSEH Actual
Breast	146	28%	48%
Colorectal	35	9%	11%
Lung	30	14%	10%
Endometrium	16	6%	5%

These tables compare the top primary sites at FSEH with the national statistics of new cancers. The percentages are based on the actual number of cases reported by site and sex both nationally and at FSEH. The number of new cancer cases at FSEH for 2012 totaled 506 (201 men, 305 women). **American Cancer Society Facts & Figures 2012*

Deaths by Site and Sex

Male	FSEH	National Estimate*	FSEH Actual
Lung	31	29%	40%
Colorectal	8	9%	10%
Prostate	4	9%	5%

Female	FSEH	National Estimate*	FSEH Actual
Lung	16	26%	30%
Breast	9	14%	17%
Colorectal	5	9%	9%

Cancer related deaths reported by Franciscan St. Elizabeth Health. Cancer Registry in 2012 totaled 130, (77 men, 53 women). These figures were derived through the Cancer Registry's efforts to do lifetime follow-up on all cancer patients in our database.
